

# PathHunter® eXpress CHRM3 Total GPCR Internalization Assay

Catalog Number: 93-0775E3 Lot Number: See Vial

Contents: 1 x 10<sup>6</sup> cells per vial in 0.1 mL

## **Background**

PathHunter eXpress Total GPCR Internalization cells are engineered to co-express the ProLink™ (PK) tagged GPCR, and an Enzyme Acceptor (EA) tag localized to the endosomes. Activation of the GPCR-PK induces internalization of the receptor in EA-tagged endosomes, forcing complementation of the two β-galactosidase enzyme fragments (EA and PK). The resulting functional enzyme hydrolyzes substrate to generate a chemiluminescent signal. These cells have been modified to prevent long term propagation and expansion using a proprietary compound that has no apparent effect on assay performance.
