### PathHunter<sup>®</sup> CHO-K1 AVPR2 β-Arrestin Cell Line

Catalog Number: 93-0588C2		Lot Number:
Contents:	2 vials, 1 x $10^6$ cells per vial in 1 mL	

#### Background

PathHunter  $\beta$ -Arrestin GPCR cell lines are engineered to co-express the ProLink<sup>TM</sup> (PK) tagged GPCR and the Enzyme Acceptor (EA) tagged  $\beta$ -Arrestin. Activation of the GPCR-PK induces  $\beta$ -Arrestin-EA recruitment, forcing complementation of the two  $\beta$ -galactosidase enzyme fragments (EA and PK). The resulting functional enzyme hydrolyzes substrate to generate a chemiluminescent signal.

#### **Functional Performance**

Cells were plated in a 384-well plate and incubated overnight at  $37^{\circ}$ C and 5% CO<sub>2</sub> to allow the cells to attach and grow. Cells were then stimulated with a control agonist, using the assay conditions described below. Following stimulation, signal was detected using the PathHunter Detection Kit according to the recommended protocol. Please refer to page 2 for recommended assay reagents, detection reagents, and control compounds.
